A company formed by a team  
whose mission is to manufacture  
all **Justor** products with the  
highest quality and warranty

# Objective: quality assurance, prestige and brand pride

The **Justor** spring hinges are fittings designed to ensure smooth automatic closing of all types of doors, windows, covers, etc.

Designed in **aluminum, stainless steel, iron and/or plastic**, our wide range of products offers solutions for single acting doors as well as double acting doors (swing doors).

With a distinguished **spring system** consisting of a set of **blades** working by torsion, lifetime of these products can reach up to 500.000 opening and closing cycles. The strength of the spring is always adjustable and the loading capacity of these products can be up to 250kg, depending on chosen product and finishing.

## Solutions for all types of doors

12

Manufacturers since 1946, our spring hinges are sold in over 70 countries. The reason for this success is that we meet the **different needs** demanded in such diverse industries as metal, wood, food, health, aeronautics, etc. and in all types of indoor and outdoor architecture projecting today.

# Common considerations for all hinges

## spring system

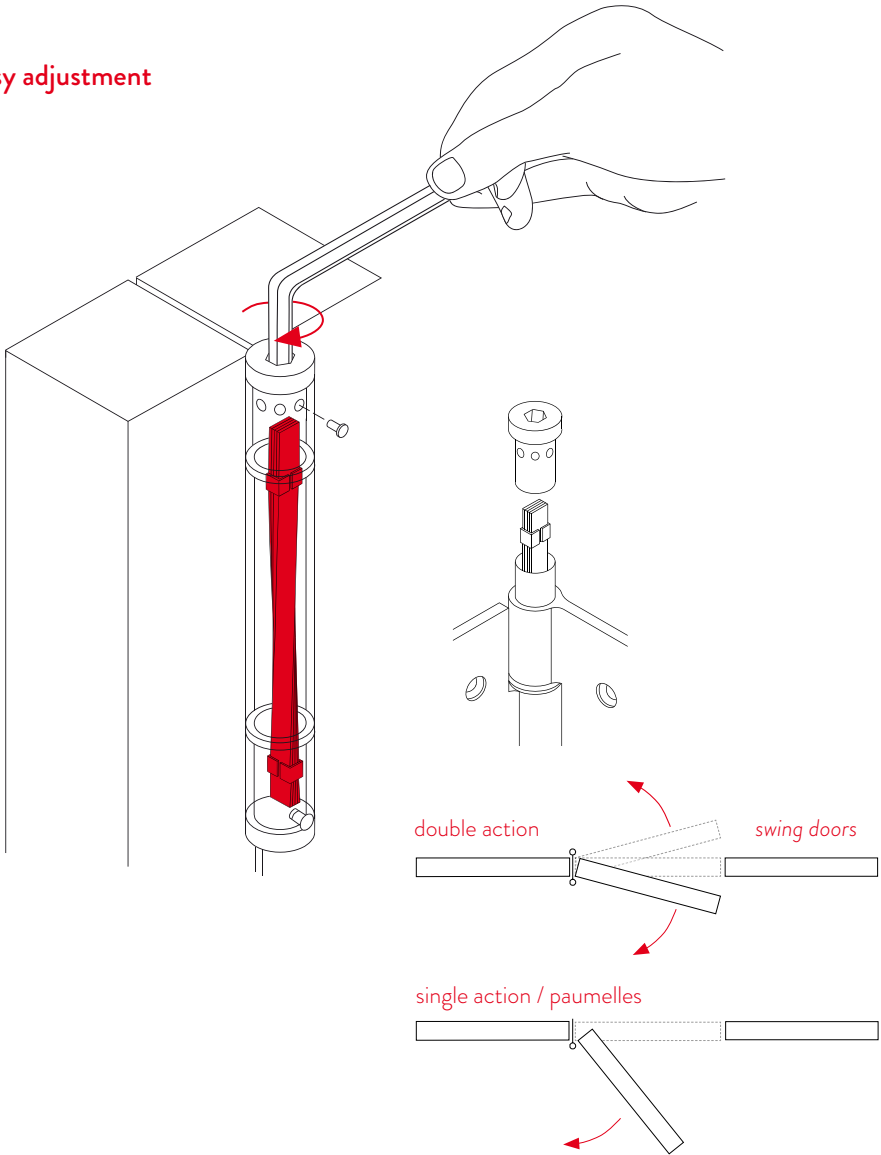

Our spring system is composed of a set of blades that works by torsion and underlies the high performance of our spring hinges.

Either **iron** or **stainless steel**, the quality of material used in its manufacturing, its high resistance to breakage and deformation and its optimum elasticity makes a big difference on the market between a **Justor** spring hinge and a normal spring hinge.

Until today there isn't an equal spring system used to assemble spring hinges, this is a very important fact because this element is what really determines the door weight capacity, as well as the opening/closing cycles, namely, the lifetime cycles of the product.

easy adjustment

DA double action

## DA 120 DA 180

Hinges for swing doors, conceived for a lot of transit. Available in 3 different widths, 30mm, 40mm and 50mm (only DA 180), they provide a solution to any need.

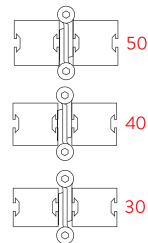

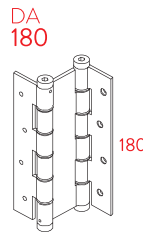

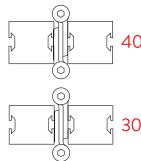

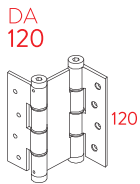

### Uses

Clinic and hospital doors, industrial and design kitchens, interior entries to warehouses and shops in general.

### Features

For wooden and aluminum doors. Spring resistance 500.000 opening and closing cycles. Available in silver, gold, bronze, white and black. Possibility of manufacturing in other colors. Finishings with straight edge (90°) and round edge (R=10).

DAW 180

22

DA double action

## DAW 120 DAW 180

Hinge designed for direct mounting on frame or wall, without milling or rebating. **It reduces up to 50% assembly time compared to a conventional spring hinge.**

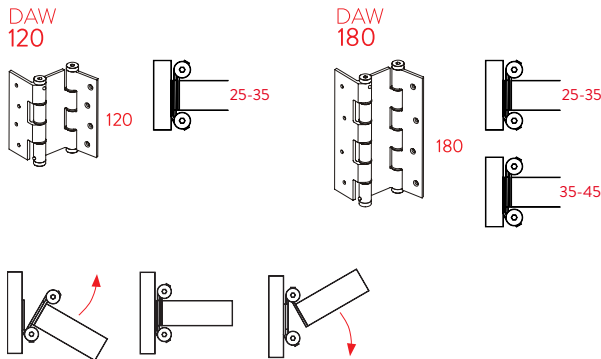

### Uses

Especially suitable in applications for woodwork in restoration and interior architecture.

### Features

Exclusively available in anodized aluminum, finishing in various colors. High resistant polyamide washers, zamak chrome or black cap (depending on model) and galvanized steel pins. Adjustable closing power and high loading capacity. More than 500.000 lifecycles.

DA R40 180

24

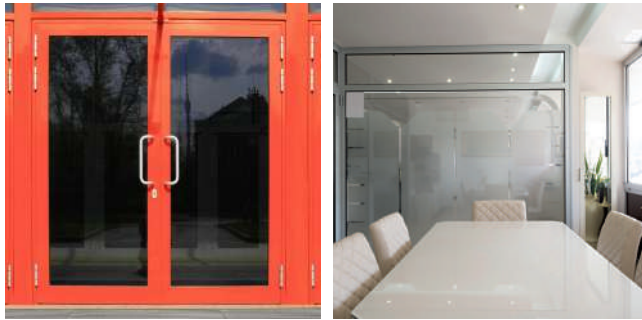

DA double action

# DA R40 180

Specifically made for the aluminium market, this hinge adapts perfectly to all kinds of swing doors with R40 profile. This is possible thanks to the specific design of each of its blades, which facilitates its fitting within the profile itself, achieving an almost perfect functioning.

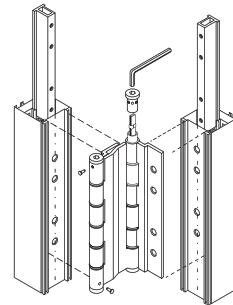

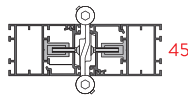

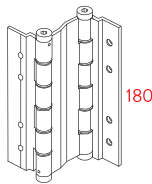

### Uses

Sports facilities, exhibition centers, pharmaceutical laboratories and spray booths.

### Features

3-points of force intensity, easily adjustable. Optimal work efficiency with 2 hinges assemblies, as well as 3 hinges installations. Load capacity up to 65kg.

## DA 120 DA 180

Prepared to work in especially harsh environments. Available in stainless steel **AISI 304** and **AISI 316** stainless steel, better known as “Marine Steel”.

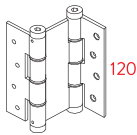

### Uses

Coastal facilities, nautical industry, saline environments, food industry and livestock sector among others.

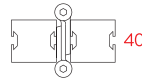

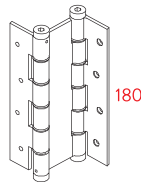

### Features

Polished stainless steel, sintered caps and washers **AISI 316**, pins and inner shaft **AISI 304**. Stainless steel inside leaf spring **AISI 301**, covered with corrosion protective grease, especially suitable for marine environments.

## DA 120 DA 180

Hinge prepared for traditional installation to be fixed with screws, as well as for installation by welding on frame and door.

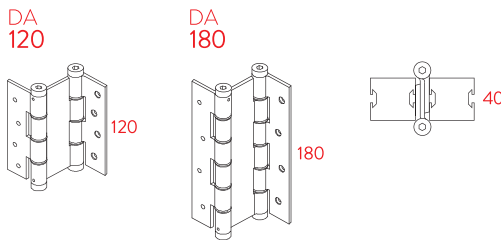

### Uses

Accesses to transport machinery, internal factories passages and metal industry in general.

### Features

Finish in galvanized steel. Force adjustment with pin. Maximum performance even with minimum tension. Capacity up to 20kg per hinge (see application table).

AL

DA double action

## DP 120

Double action spring hinge for swinging doors. Easy and fast installation. It is installed directly without milling frame or door.

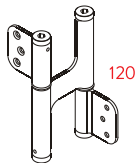

### Uses

Light doors to access pharmacy counters, bars or other food and catering stores.

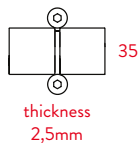

### Features

It allows to dismantle the door without having to unscrew the pin. Just 2.5mm thick. Load capacity of up to 20kg. Double action spring hinge 120mm length, 3 possible tension points of the inner spring. Available in aluminum in silver, gold, bronze, white and black finish.

SA single action

# SA 120 SA 180

Hinge for wooden and aluminum doors. Closing strength adjustable with multipoint cap.

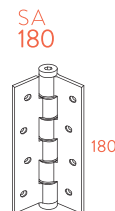

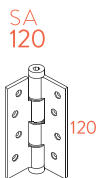

### Uses

Suitable for entries requiring immediate closing, especially when it isn't possible to install a traditional hydraulic door closer.

### Features

Made of anodized aluminum. Four fixation points on each blade. Finishing with straight edge or round edge. Can be manufactured in any RAL colors on demand.

SST

SA single action

## SA 120 SA 180

Specially prepared for outdoor use, in damp and/or saline environment. Shaft protected with anti corrosion grease. Allows door opening to 180°.

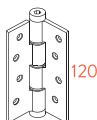

### Uses

Hotel rooms, locker rooms, accesses to boat docks, facilities in chemical and pharmaceutical industry as well as any type of marine environment.

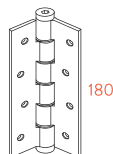

### Features

Hinge made of stainless steel AISI 304 or stainless steel AISI 316. Polish treatment. Sintered caps and washers, always in stainless AISI 316.

SA 120

SA 180

SA single action

## SA 120 SA 180

It allows installation by welding providing the same performance as by fixing with screws. The steel hinges provide the same work performance as the aluminum or stainless steel hinges.

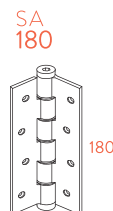

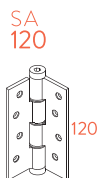

### Uses

Pedestrian accesses, private homes, boiler works, external fencing, metal constructions, forge works.

### Features

Galvanized Steel. Easy strength adjustment. High load capacity. 3mm thick blades. Minimum of 250.000 working cycles.

aluminum

single action  
ST series

STW 150  
STC 150

40

ST series

## STW STC 150 150

Hinges with a special design, where the blade works inside the other blade, providing exceptional thinness, no need to rebate.

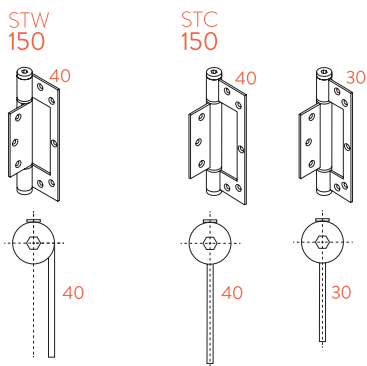

### Uses

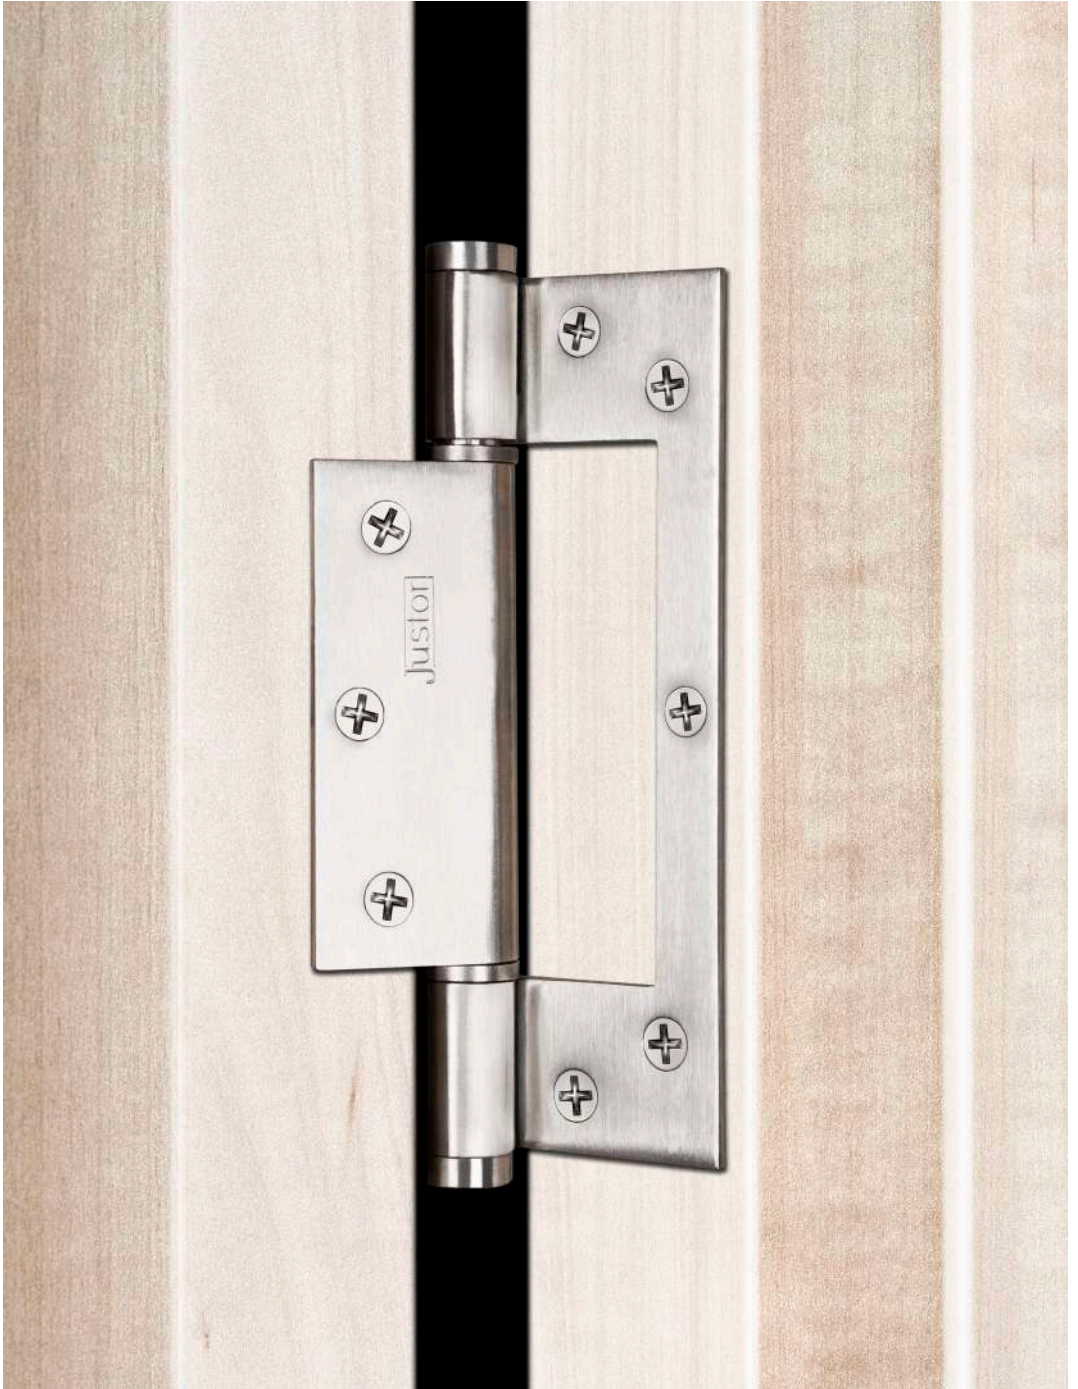

Any type of light interior doors like offices, archives, cabinets...

### Features

In the STW version, the blades are displaced from the axis of the hinges, allowing direct installation to any surface without sub frame.

STC version has two different blade lengths, providing solutions to existing frameworks in different thicknesses.

SST

ST series

## STW STC 150 150

Hinge with the rotation axis displaced. Just 2,5mm thick.  
Respects the natural space between frame and door.  
Reduces assembly time since it can be installed directly  
without milling frame or door.

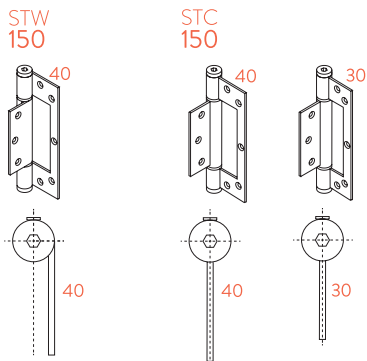

### Uses

Interior design, sports facilities, health centers and food industry.

### Features

Stainless steel AISI 304. Lower axis fixed. Washers and pins in marine AISI 316. Adjustable closing strength.

SF SF series

# SF 120

Overlapping single action hinge, specially indicated for installations in phenolic and/or similar materials.

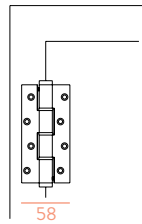

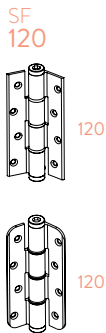

### Uses

Doors in exhibition stands, fencing doors, call centres.

45

### Features

Available in aluminum, presented in various colors. Round edge finish. Total length of only 120mm. Load capacity up to 40kg. More than 300.000 opening and closing cycles.

# spring hinge

AL

spring hinge

MB

### spring arm

## MB

Easy installable product. Possibility to easily enable or disable spring function.

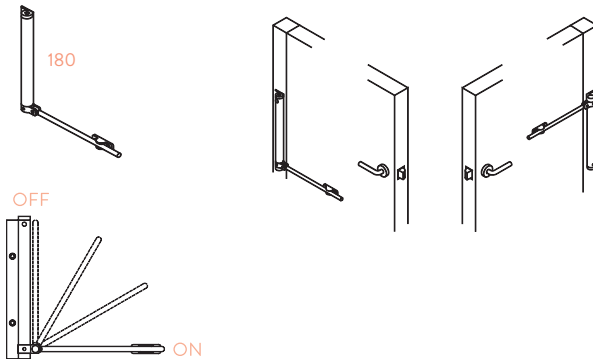

### Uses

Bathroom doors, storage rooms, stores and interior doors in general.

### Features

Easy adjustable spring strength. Endurance of more than 250.000 work cycles. Aluminum finishing in various colors. Special model for outdoor installation.

MB

MP spring hinge

# spring hinge MP

Perfect for installation as third hinge on doors, in order to close the door automatically.

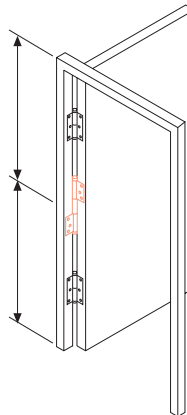

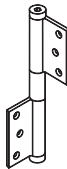

### Uses

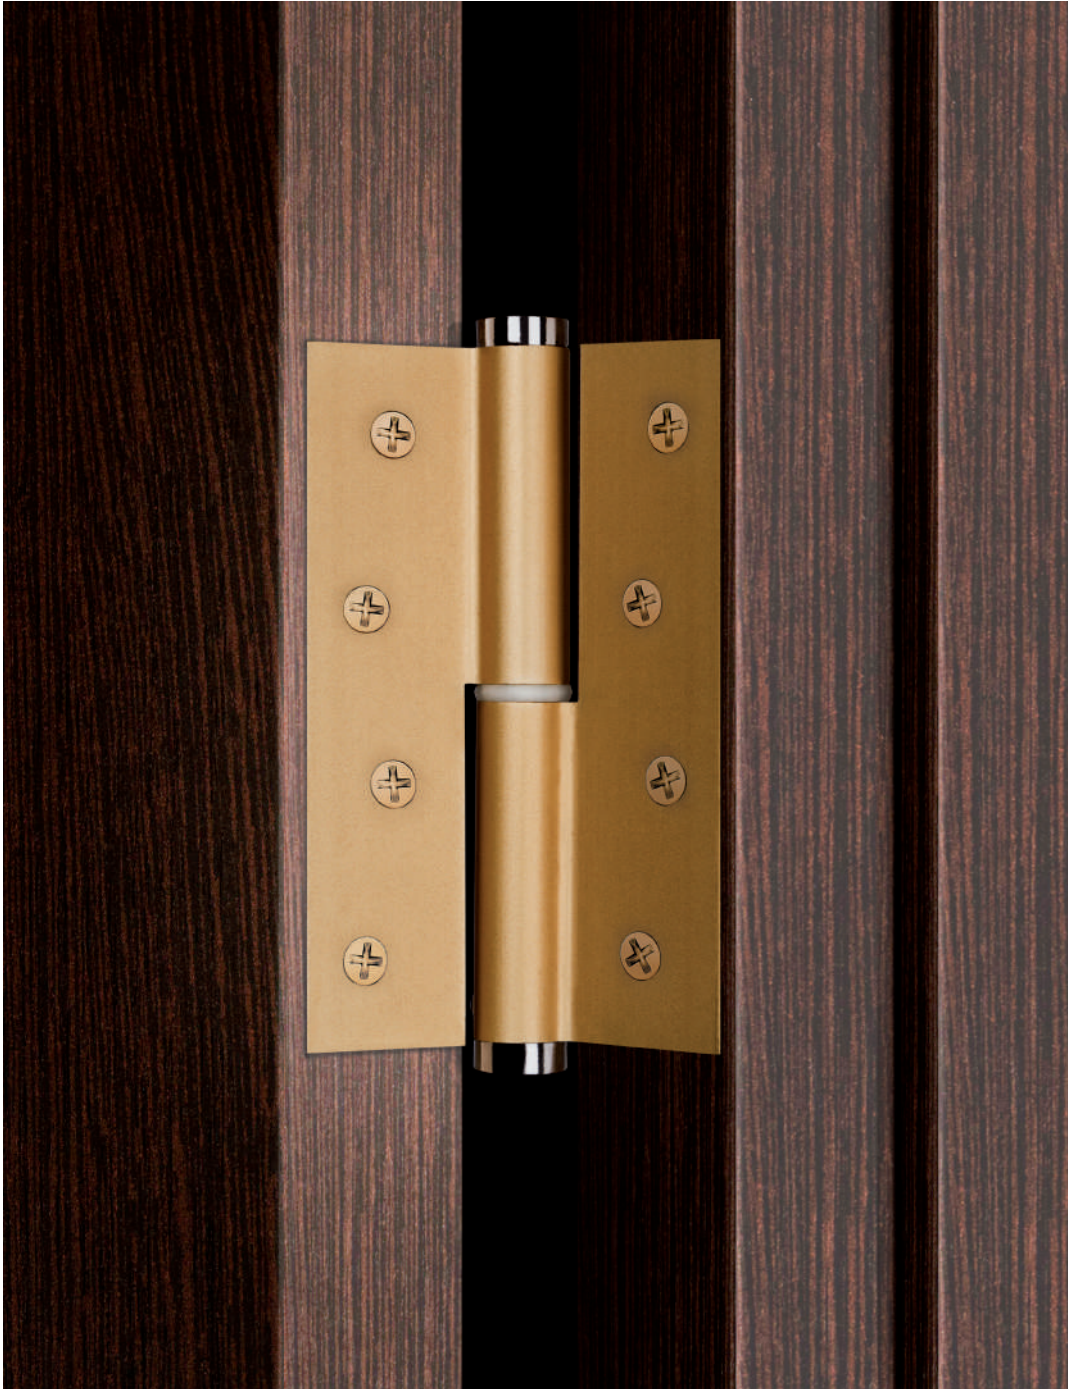

Wardrobe doors, changing rooms, offices and others.

### Features

Complementary product on doors with already-existing hinges. Pushes doors up to 40kg. More than 200.000 work cycles. Anodized aluminum finishing and presented in blister package. To be installed at the center of the door allowing an automatic closure.

MP

spring hinge

PM

# spring loaded paumelle PM

For wooden doors. Makes installation easier, not necessary to unscrew the hinges if removing the door is necessary at any given time.

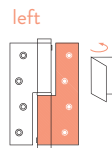

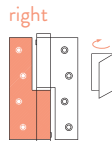

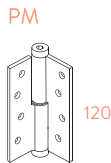

### Uses

Cottages, apartments, hotels, schools and convention centers.

### Features

Made of aluminum exclusively for woodwork. 120mm length. For interior doors. Load capacity up to 20kg. Available in left and right models according to installation.

## Drop Hinge with bearing

PG 180 CR      PG 240 CR      PG 240 CRP

Hinges with smooth opening and closing actuation due to bearing on the central axis, instead of washer, which practically doubles its capacity.

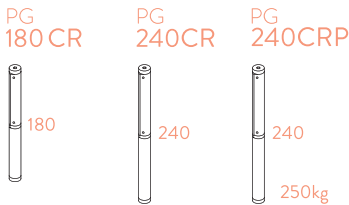

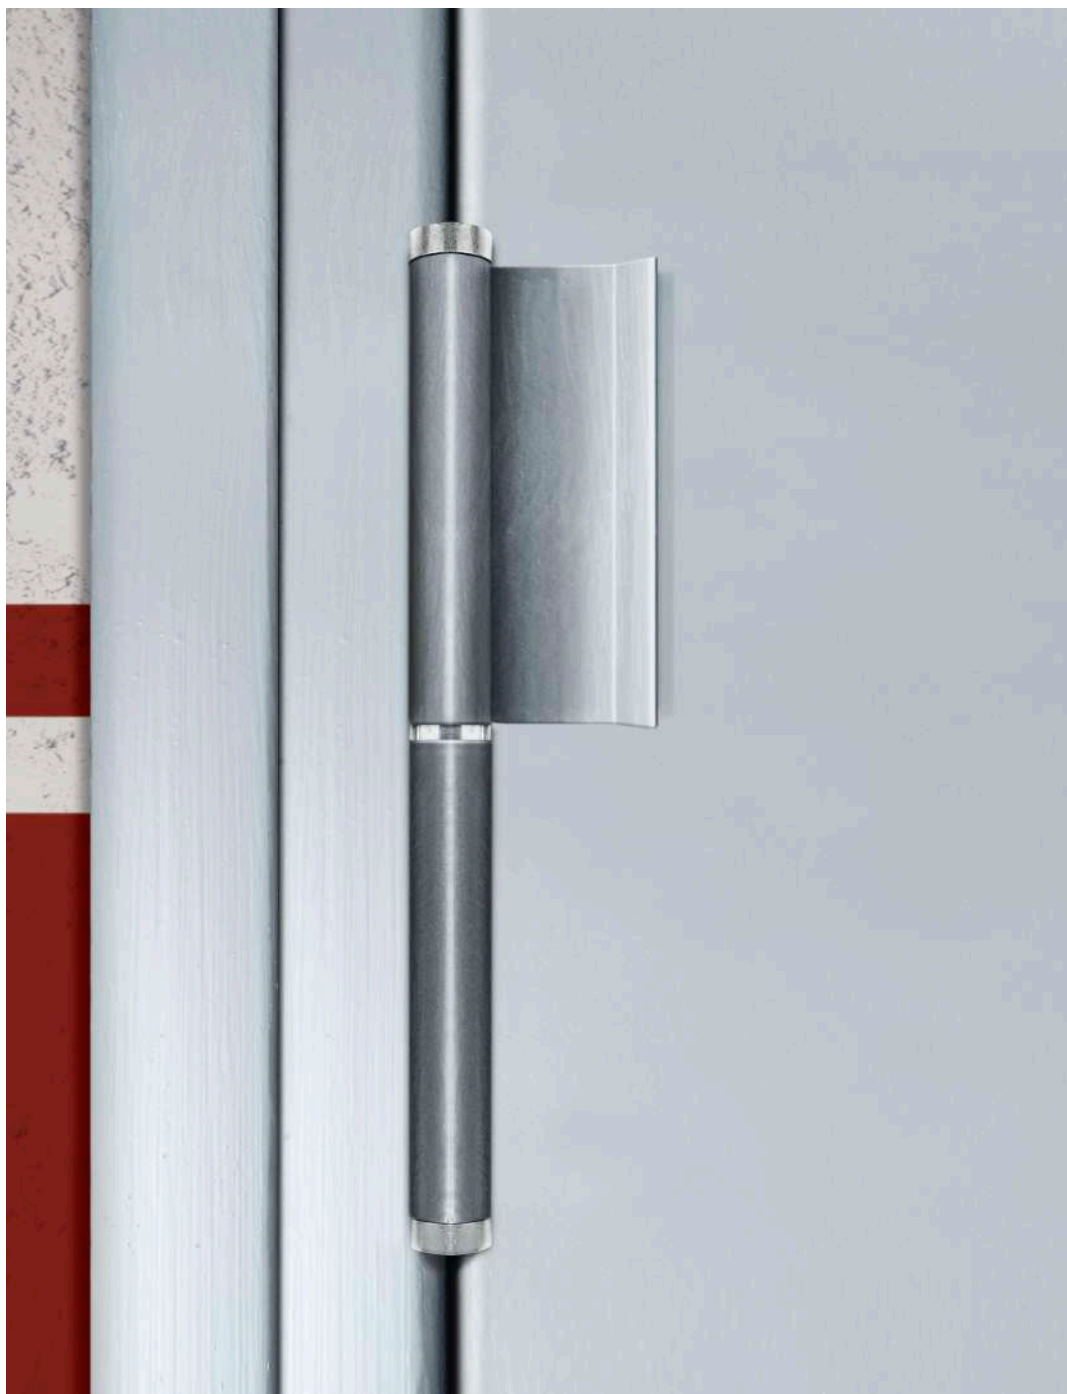

### Uses

Gate fences, furnaces, private gardens, doors of industrial lifts, exterior architecture in stainless steel.

### Features

Made of steel or stainless steel. It comes in 180mm and 240mm length. High load capacity, for doors up to 250kg in weight. Components are manufactured in stainless steel AISI 304 and AISI 316, offering high corrosion resistance.

IRON

PP  
spring hinge**Blade Hinge** with washerPP  
**240**

Hinge built with 2 steel profiles. The upper pushes the door, by working on the lower washer, which is welded to the frame.

**Uses**

Warehouse doors, spray cabins, livestock accesses, fencing accesses.

**Features**

Pushes, but does not carry the weight of the door. Single length of 240mm. High resistance to deformation. 3 positions adjustable force. Opening up to 180°.

If you wish to know more about Justor products, have a look at the **general catalogue of Talleres Trepát S.A.** and discover other solutions and our **Blue Line**.

You can also visit our online page [www.justor.com](http://www.justor.com).

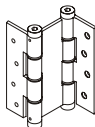

## Our products

**Door closers.** Available with arm set. Ready to resist frequent and/or intensive usage, on doors up to 120kg.

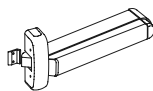

**Retaining brakes.** They prevent doors from slamming and ensure the total and silent closing of the door.

**Hinges.** Always with a laminated spring set inside, for all types of doors, from screen doors of only 5kg to swing doors of 60kg and iron doors of 250kg.

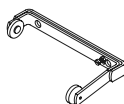

## Blue Line

**Antipanic.** 100% reversible. Certified to be installed on fire doors.

**Pin door.** Sliding and sliding flush bolts for all types of doors and windows.

**Complements.** Complementary products for doors and windows. Addressed to the professional field of aluminium and wood.
